

## Daily Standup

**Project Name: Supply Management System      Group Name: MeAndTheOtherGuys.**

**Sprint Number: 18**

**Date: 26/03/2025**

**Meeting length: 2 hour 10 minutes**

### List of attendance:

**Name: Carlo Napolitano      Attended (Yes)**

**Name: Omed Bahaddin      Attended (Yes)**

**Name: Fares Eisa      Attended (Yes)**

**Name: Khalid A Aden      Attended (Yes)**

**Name: Faisal Dahir      Attended (Yes)**

### Project Progress:

**Team Member (1): Carlo Napolitano**

#### What did you accomplish Today?

Today I completed the user registration and login as well as connection SQL with the back and front end of the project to connect the sub-category and main category to the client side so that once the user logs in as a client, they are then able to view all categories. In addition, I also helped a teammate with completing the owner side of the project which was simply making it so that once the owner logs in they are then able to view all registration users on the site and help with connecting the SQL with the main project.

**Team Member (2): Omed Bahaddin**

**What did you accomplish Today?**

Today I sent over what I had done so far, in addition, started getting help from both group members as the client side of the project was a lot more complex, than we originally thought, and needed to be completed first to proceed with the owner side as the owner side is just pretty much displaying already made information.

**Team Member (3): Fares Eisa**

**What did you accomplish Today?**

Today I completed the pseudo-code for the front end of the client side, as well as attempted to connect SQL with the front end but was unable to do so as I was placing the files in the wrong area and was meant to place the files in the model side, which the leader help me fix and made it very clear on how he did so, in addition, he also gave support in completing the owner side, which now allows any login owner to see all registered user.

**Team Member (4): Khalid A Aden**

**What did you accomplish Today?**

Today I was given step-by-step instructions on how to set up the project as well as a task that was to start the logistic side of both the front end and back end.

**Team Member (5): Faisal Dahir**

**What did you accomplish Today?**

Today I was given step-by-step instructions on how to set up the project as well as a task which was to start testing the given files.
