

Daily Standup

Project Name: Supply Management System Group Name: MeAndTheOtherGuys.

Sprint Number: 18

Date: 27/03/2025

Meeting length: 40 minutes

List of attendance:

Name: Carlo Napolitano Attended (Yes)

Name: Omed Bahaddin Attended (No)

Name: Fares Eisa Attended (Yes)

Name: Khalid A Aden Attended (No)

Name: Faisal Dahir Attended (No)

Project Progress:

Team Member (1): Carlo Napolitano

What did you accomplish Today?

Today I had a call with one of the team members about how I was able to connect SQL with the front end and make sure he was also able to do so, in addition, we talked about what tasks needed to be completed on the client side as well as updating the GitHub and letting everyone know how to install it again. Also, today I walked through the coursework again to check where we were and what still needed to be done. Lastly, I started working on the seller side of the client front and back end and ran into some issues as I was unable to

connect the SQL seller part to the front end, the same way I was able to connect the category.

Team Member (3): Fares Eisa

What did you accomplish Today?

Today I had a call with one of the team members about how I was able to connect SQL with the front end and make sure he was also able to do so, in addition, we talked about what tasks needed to be completed on the client side. Also, today I walked through the coursework again to check where we were and what still needed to be done. Lastly, I made another pseudo-code for the client side which was for both the category and seller and buyer side that I sent to everyone to let them know what to work on the client side and what am working on, but I ended up running into some problems, for example, the page kept on refreshing meaning that I was unable to add any buttons onto the front end and was not able to fix this issue so I start working the buyer side which was converting the string into a usable button for the user to buy stock from the sellers But finished the day off updating the daily meets.
