Daily Standup Meeting

Project Name: Supply Chain Management System   **Group Name:** MeAndTheOtherGuys.

Sprint Number: 18   **Date:** 04/02/2025

Meeting length: 2 hours

List of attendance:

Name: Carlo Napolitano   Attended (Yes)

Name: Omed Bahaddin   Attended (Yes)

Name: Fares Eisa   Attended (Yes)

Project Progress:

Team Member (1): Carlo Napolitano

What did you accomplish Today?:

Today, we talked about how we will approach the group project. We decided to make a list of all the work we had to do to get started then split the task amongst ourselves. I decided to learn to understand both SQL and the Hashing index, to understand how to sort data using hash.

What obstacles are impeding your Progress:

One thing I had to find out was how hash worked when used to sort and save data, as it was a bit confusing at the start as when adding items I was trying to figure out how to search for items using only a part of the word and not all of it for example if you wanted to search for a "laptop" how could you make it so that all you would need to type is "lap" and it would still show you "laptops" amongst however things.

Team Member (2): Omed Bahaddin

What did you accomplish Today? :

Today, we talked about how we will approach the group project. We decided to make a list of all the work we had to do to get started then split the task amongst ourselves. I decided to set up Azure as it was one of the first things we had to set up to get started with the project as well as make it easier for us to disrupt work easily and well as making others know what tasks need to be complete and what tasks are already being worked on.

Team Member (3): Fares Eisa

What did you accomplish Today?:

Today, we talked about how we will approach the group project. We decided to make a list of all the work we had to do to get started then split the task amongst ourselves. I decided to update the daily meeting as well as start researching different types of services we could provide as there were many options to choose from so I picked out a range of different services we could potentially pick from and researched the best manufacturers of said products to be able to provide business a range of different manufacturers whom they could pick no matter where they were based or what type of products they needed.
